

SAVAGE RAPTOR

SAVAGE LAUNCHES THE MOST ADVENTUROUS DINGHY YET, THE RAPTOR EXTREME

For 120 years, Savage has consistently added innovation to Australian boats and today would like to introduce the Raptor Extreme, the most adventurous dinghy yet.

The Raptor Extreme offers customers a v-nose punt dinghy with increased internal freeboard thanks to the higher sides and greater beam. Suited for river, creek and estuary fishing, boaties of all ages will find enjoyment out of this boat.

Available in two models, 355 and 375 with 15 hp and 20 hp

ratings respectively, the Raptor Extreme is a great choice for off-road and camping adventures. Trailerable or a cartopper, this dinghy intends to add excitement in the most remote areas.

This boat comes standard with grab rails for loading, anchor storage and a deep floor for comfort while on the water. In addition, this model has large front and rear bench seats with plenty of room in the centre for fishing and crabbing.

The Raptor family consists of the Savage Raptor, Raptor

Extreme and Raptor Pro. They range from 3.5m all the way up to 4.4m and are fit for every Australian. A versatile group of dinghies from an adventurer, to a work horse, from the rainforests in Northern Queensland, to the lakes across Western Australia.

'Savage now has the most complete line-up of dinghy's in Australia with the addition of the Raptor Extreme' said Nick McCartney National Sales Manager for Savage Boats. 'This dinghy has the most volume in our cartopper line-up and is ideal

for Australian Adventurers.'

'I can picture this boat in so many places, whether it be a kid who just graduated to a full-size dinghy, or a kid at heart who can't get enough of the water' said McCartney.

The Raptor Extreme was first launched at the Melbourne International Boat Show and the new addition was well received by Victorian boaters all around.

For more information on the Raptor Extreme or the entire Savage range visit your local Savage dealer or www.savageboats.com.au.
